

Director, Business Technology

Magi Seal Corporation is seeking a unique individual to assume the important role of Director, Business Technology. This individual has a strong business orientation background, technical expertise and advanced knowledge of web-based application development. A solid conceptual and practical thinker, this individual understands the important role that technology and communication systems can provide a rapidly growing and innovative organization.

As a key member of our dynamic leadership team, the Director will have ownership and responsibility for all of our technology-based strategies and operations, including the day-to-day technical, administration and support activities for our information and communication systems that are used to support consumers, business partners, field technicians and internal teams.

The ideal candidate will be a creative self-starter who is able to lead a small team that is focused on delivering amazing results while balancing the many demands of a customer-focused enterprise. As a charismatic individual who has strong communication skills, the Director will also have extensive experience with database development technologies, user-interface design and is thoroughly comfortable with deploying new applications using emerging platforms and technologies. Experience with integrating social media strategies to help meet customer service needs will also demonstrate this individual's solid grasp of the role that technology plays in continually moving our organization forward.

RESPONSIBILITIES:

- Provides leadership for the company's technology and communication strategies and operations;
- Manages application development and integration activities for our multiple business processes;
- Responsible for all information systems and telephony infrastructure (computers; network; services; databases; applications; security etc.);
- Inspires our technology team to deliver outstanding service, support and results for all of the company's constituents (customers, business partners, vendors and employees);
- Ensures the maintenance of strong information collection, management and security protocols;
- Develops plans, budgets and programs effectively for all stakeholders as required.

SKILL REQUIREMENTS:

- Leadership experience with managing and developing a small, but committed, technology team;
- Extensive experience with database development, including integration of SQL Server repositories with real time web based applications;
- Knowledge of FileMaker Pro, Filemaker Server Advanced, FileMaker php API, FX.php, or similar systems;
- Experience with web application development using Ruby on Rails, HTML, JavaScript, CSS, php, MySQL, SQL Server, and other content management systems;
- Knowledge about computer and network hardware and software: printers, scanners, routers, switches, local network setup, DHCP, FTP, HTTP, SSL, etc.;
- Familiarity with integration of QuickBooks and Filemaker
- Knowledge of operating systems: Windows XP, Mac OS X, other software: Microsoft Office, Adobe Reader, Adobe Acrobat, etc.
